State Narrative Summary

Illinois' Division of Alcoholism and Substance Abuse offers an array of early intervention services, including rapid testing, pre- and post-test counseling, referral services, risk assessment, HIV/AIDS education, and outreach. In Fiscal Year (FY) 2007, 37 agencies provided HIV counseling, testing, and referral services through more than 60 substance abuse treatment sites; trained counselors provided 40,135 hours in pre- and post-test counseling and an additional 17,200 hours of outreach, case management, and staff education. The Division provided 29 days of free training to HIV counselors. For FY 2008, the State had planned to increase

*The most recent data published prior to October 1, 2007 by the CDC is Table 14, Reported AIDS cases and annual rates (per 100,000 population), by area of residence and age category, cumulative through 2005-United States, HIV/AIDS Surveillance Report 2005 Vol. 17, U.S. Department of Health and Human services, Centers for Disease Control and Prevention, National Center for HIV, STD, and TB Prevention, Division of HIV/AIDS, Prevention, Surveillance, and Epidemiology. Single copies of the report are available through the CDC National Prevention Information Network, 1-800-458-5231 or 301-562-1098 or <http://www.cdc.gov/hiv/topics/surveillance/resources/reports/2005report/table14.htm>

the number of providers involved in early intervention services, including the number who offer rapid testing. A 2-day cross-training workshop on substance abuse and infectious disease was being developed.

Full State Narrative

FY 2005 (COMPLIANCE)

HIV Counseling, Testing and Referral services provided by Division of Alcohol holism and Substance Abuse (DASA) continued to comply with the most recent adopted changes in State law governing HIV. All protocol for services follows the recommended AIDS Confidential Act (410 ILCS 305) and met the requirements of the 42 CFR, part 2. In addition, monitoring of providers included review of compliance to 45 CFR, part 96. Public Health established codes for AIDS Confidentiality and Testing Code (77 Ill. Adm. Code 697) that all DASA training and protocol are based. The information sharing between agencies was seamless.

FY 2007 (PROGRESS)

The 37 agencies provided HIV Counseling, Testing, and Referral (CTR) Services through over 50 substance abuse treatment sites state-wide. Division of Alcohol holism and Substance Abuse (DASA) agencies provided 16,560 HIV tests during the year (Data was unavailable from Illinois Department of Public Health (IDPH) to confirm type of clients tested and number of positives). Current providers are increasing the number of sites where HIV CTR occurs. The trained counselors provided 40,135 hours in pre and post-test counseling. An additional 17,200 hours were utilized in outreach, case management, and staff education. DASA provided 29 days of free training to HIV counselors in identified programs. Of those 29 days, 14 were provided to new counselors who are required to pass the IDPH Home Study test, and attend a minimum of 6 days of DASA training to become an HIV counselor. Three of this year's trainings were focused on incorporating hepatitis counseling. The DASA HIV client interview record was adapted to include questions regarding hepatitis and hepatitis A & B vaccination. Collaboration has increased between IDPH during the year, to include monthly meetings regarding reporting requirements, accuracy and rule changes that had implications for DASA HIV CTR services. Progress was made in understanding "name reporting" with consent, referral service opportunities and co-facilitation of training opportunities.

DASA staff worked closely with the IDPH HIV Prevention and Community Planning Group to increase the understanding of services provided in substance abuse treatment. Additionally DASA staff participated on the State HIV/AIDS Interagency group to focus on working together for the benefit of Illinois consumers. DASA HIV CTR sites are located throughout the state of Illinois. There are 24 sites located in the city of Chicago at treatment centers. As providers become aware of the value of the HIV counseling and testing in recovery, organizations contracted and trained to provide services are expanding the locations they offer HIV CTR. Twenty-five sites are located in counties other than Cook. All of the treatment providers (approximately 400) state-wide must provide HIV education to be licensed as a treatment provider. Outreach services were focused on needle users and Hispanic substance abuse individuals in the Chicago area. Two sites were specifically identified to provide counseling and outreach for these groups. The focus of the contracts were to identify users in the community, provide HIV counseling and testing and linkages to substance abuse agencies for treatment and IDPH for medical support as applicable. During SFY 2007, the DASA training team attended a second SAMSHA training on Ora-Quick® and a New York Trainer of the Trainers on Hepatitis. At the December, SAMSHA training 25 individuals, 15 agencies received Ora-Quick® training in a 3 day workshop. Due to the CLIA waiver many providers have been hesitant in converting to Ora-Quick®, in place of Ora-Sure®. During FFY 06 and 07 over 45 different DASA HIV counselors were trained in Ora-Quick®. DASA contracts with the Illinois Department of Health, Division of Laboratories as a part of an interagency

agreement. The interagency agreement included a provision for HIV testing for approximately 13,200 for OraSure and blood specimens.

FY 2008 (INTENDED USE)

The State of Illinois has plans to get at about 15 providers using Ora-Quick® and well as Ora-Sure® in this fiscal year. Education and cost-effectiveness will need to be objectives. In additions the Division of Alcohol holism and Substance Abuse(DASA) has a committee established to standardized post counseling evaluation of the HIV service provided at treatment centers. The provider advisory group wants to review impact areas on clients (on treatment, on substance use and on recovery). DASA plans to collaborate with the Illinois Department of Public Health (IDPH) to provide hepatitis screening and testing downstate Methadone and HIV counseling, testing, and referral sites. This collaboration will help identify and deal with problems related to needle users receiving hepatitis testing and treatment. DASA's has plans to begin to increase the number of providers offering HIV counseling, testing and referral and overall linkages for such provision. This would be a three to five year plan to bring providers in compliance with Center for Disease Control and Preventions' HIV recommendations. DASA has plans to provide at least one two day workshop in Substance Abuse and Infectious Diseases with CSAT, CDC, and HRSA cross-training for collaborative systems of prevention, treatment and care.

HIV Early Intervention Services

The Illinois Department of Public Health (IDPH) expended general revenue funds of \$534,702 on TB and 17.77% were substance abuse clients. Approximately, \$95,017 was spent on substance abuse clients. DASA monitors continued to informed and provided access to the new CDC Guidelines for Preventing the Transmission *M. Tuberculosis* in Health-Care Settings, 2005. These guidelines have become a part of the proposed rule for DASA. The funding spent in 2005 on early intervention services for substance abuse clients in treatment is part of a the overall treatment experience and not separated out. The amount reported comes from IDPH and is only general revenue fund dollars spent on early intervention, and treatment services for HIV positive substance abusers. This amount for 2005 was approximately \$3,626,927. In 2005, the DASA HIV Counseling, Testing, and Referral services were funded via requests for proposals (RFP) based on State Epi Data. This bid process decreased the number of rural sites but did not eliminate them. At the same time it included new treatment providers who had not formally provided such services within their agency. This positive expansion in much needed areas was overall very beneficial. DASA noticed only one drawback that due to the amount of special knowledge some providers were not in a place to start providing services as the year began. DASA placed special emphasis on training and technical assistance to bring these providers up to recommended quality counseling as soon as possible. In SFY 2007, DASA has collaborated with Illinois Department of Public Health to have the TB section present at the October 5th, 2006, all HIV Counseling, Testing and Referral providers.
